

It may be invisible, but the results of ClearPlex[®] Windshield Protection Film are very real.

SAVES MONEY

"We estimate that we have saved \$620,000 in windscreen replacement over the past year. This does not include additional labour to remove and replace the windscreen and out of revenue service time."

– Geoff Bell | Reliability Officer, Metro Trains Melbourne, Australia

KEEPS FLEETS ON THE ROAD

"ClearPlex...performed as advertised. There were many incidents of rocks and road debris hitting the windshields of the cars and the ClearPlex film protected the windshield. We encourage anyone who is considering using ClearPlex film to protect your fleet vehicles."

– Roger Zimmerman | Hertz Rent-A-Car, Denver International Airport

EASY TO INSTALL

"I am now very confident in dealing with the reality that ClearPlex works and my ability to put it on 32 vehicles. They were all different cars: a Ford GT (I did twice by the way), Lexus IS250, Ford Mustang, and an 89" x 34" windshield on a big rig, which I did outside and back rolled by myself."

– Mike Roades | Eco-Tint, Las Vegas, Nevada

PROTECTION THAT WORKS

"Just wanted to mention that I've applied your product to my car's windshield. I'm very happy with the results and the protection."

– Dave | Self-installer, Mississippi

HIGH PERFORMANCE FOR HIGH-END CARS

"I've used the ClearPlex film for years on my exotic car customers and they all love the product and appreciate the fact that they can keep their factory windshields looking like new on their prized possessions."

– Ryan Tounsley | President, Protective Film Solutions, California & Arizona

NATURAL TIE-IN

"Every time I get the product in front of people/potential customers and demonstrate the "glass punch test" they are blown away. As a Distributor, this product is a no-brainer for companies dealing in Paint Protection Film installation, Windshield replacement, new car Dealerships and Fleet Companies."

– Larry Neely | Operations Manager, PlexGlass Distributing
